

Perhaps It's Time to Think about Sustainable Sourcing

BASF Introduces the first RSPO-certified oleochemicals for the pharmaceutical industry

A key renewable raw material for numerous pharmaceutical excipients is palm kernel oil (PKO) and its respective derivatives. The ubiquitous use of these materials across industry has contributed significantly to deforestation, loss of biodiversity and climate change. As a result, there is widespread concern about these challenges among retailers, NGOs, investors and consumers. Take advantage of BASF oleochemical products certified by the Roundtable on Sustainable Palm Oil (RSPO) and align your company and products with the strong sustainability values evolving in the marketplace.

Join BASF in committing to sustainable sourcing for oleo excipients

- ✓ Contribute significantly to your own sustainable sourcing efforts
- ✓ Same high-quality, compendial oleochemical products with no physical or chemical changes
- ✓ RSPO-certified Oleochemical Products
- ✓ Certificate numbers provided with every produced and delivered batch
- ✓ Join BASF as part of RSPO to market your own products as RSPO-certified

RSPO offers the global certification of palm oil

- ✓ 4,107 members in 92 countries
- ✓ Certifies sustainability practices of palm plantations
- ✓ Certifies the integrity of the supply chain to you
